CHAPTER I.

GENERAL FEATURE.

Page 1.

In line 4 after the word "Allahabad" *delete* the remaining words in the sentence e.g. "the three . . . . . 1892."

In line 10 *add* "and" *after* "Unao."

In line 11 *delete* "and Partabgarh."

In line 13 *read* "1,050,031" *for* "1,050,225" and "1640" *for* "1640·97" and *delete* the words "with the exception of Jalaun" in the same sentence.

PARAGRAPH TOPOGRAPHY.

Delete the sentence commencing with the word "Along" in line 5 and *substitute* the following :—

"The beds of the Ganges and the Jamna differ largely in their physical characteristics. That of the former is from 3 to 5 miles in width, and contains large areas of cultivation as well as good grazing grounds and tracts of sarpat. That of the latter is generally little over a mile in width, and the cultivated area is ordinarily a narrow strip close to the cliffs, while the remainder of the land is barren sand. The main stream of the Jamna changes its course seldom, that of the Ganges more often, and the latter river has many secondary streams called sotas, which change their beds frequently."

In line 7 *delete* the words "Above the high bank" and *substitute* "Between the cliffs."

Page 2.

In line 13 *read* "bear" *for* "bears" and "to" *after* "relation."

PARAGRAPH GANGES RIVER.

In line 17 *add* "generally" *after* "ground."

In line 21 *after* the word "unirrigated" *add* the following :—

"The most inferior tracts being in pargana Bindki and the Eastern portion of pargana Fatehpur."

In the last line *delete* "wild."

Page 3.

In line 1 *delete* "cattle" and "deer."

In line 7 *after* the word "surface" *add* the following:—

"The sandy bottom found in the level land produces excellent crops when sufficient rainfall is received."

In lines 9 and 10 for the words "was in former days" *substitute* "is."

Page 4.

In line 13 *read* "extent" *for* "extend."

PARAGRAPH NUN NADI.

In line 12 *substitute* "fair" *for* "excellent."

Page 5.

In line 19 *add* "in pools" *after* "water."

In lines 23 and 24 *delete* the words "It is proposed to build" and *substitute* capital "A" *for* small "a" before "second."

In line 25 *substitute* "would" *for* "and this will."

In line 27 *delete* "Argal."

In line 8 from the bottom of the page *add* "others are found" before the words "at Thithaura."

Page 14.

In line 11 from the bottom of the page *substitute* "the Kora pargana" *for* "pargana of Kora."

Page 15.—PARAGRAPH SOILS.

In line 13 *after* the word "lime" *add* the following sentence:—

"It should be noted that the cultivators call light loam by the names of sigon and heavy loam by the name of matiyar, while clay is almost universally called chanchar.

Page 16.

In line 6 *delete* the words "termed locally tarai and kachhar."

In line 18 at the end of the paragraph after the word "account" *add* the following:—

"These figures are taken from Mr. Patterson's Settlement report. At the recent settlement the classification was not based on natural soils."

PARAGRAPH WASTE LANDS.

Substitute "the last settlement" *for* "1905" in the first line, and "251,673" *for* "266,180" and "23·97" *for* "25·33" in the second line.

In the fifth line *substitute* "13" *for* "19" and in the seventh line *substitute* "7·81" *for* "9·16."

In line 9 *delete* "last" before "settlement" and *add* "of 1870" *after* it and *substitute* "27·65" *for* "27·5."

Page 17.—PARAGRAPH MINERAL PRODUCTS.

In line 14 *read* "bichchua" *for* "bichhia."

In line 15 *substitute* "is" *for* "varies from Re. 1 to."

In line 16 *delete* "eight annas per mile" and *substitute* "twelve annas for the first mile and eight annas for succeeding miles."

In line 7 from the bottom *after* the words "cubic feet" *add* "the cost at the quarry being Rs. 3 per hundred cubic feet."

In line 6 from the bottom *substitute* "Rs. 25" *for* "from Rs. 12 to Rs. 16."

Page 18.—PARAGRAPH BUILDING MATERIALS.

In the third line *after* "tanks" *add* the following:—

"The price of bricks and lime has gone up tremendously in the last decade, from 75 per cent. to 125 per cent."

In line 4 *substitute* "$9\frac{1}{2} \times 4\frac{1}{2}$" *for* "$9'' \times 4\frac{3}{4}''$."

In line 5 *substitute* "$8 \times 4 \times 1\frac{1}{4}$" *for* "$9'' \times 6'' \times 1\frac{1}{2}''$" and in the same line and line 6 *substitute* "an average of Rs. 700 and Rs. 500" *for* "Rs. 300 and Rs. 225."

In line 7 *substitute* "160" *for* "75."

In line 11 *substitute* "Re. 1-9-0" *for* "from Re. 1 to Re. 1-8-0."

In line 19 *after* the word "fuel" *add* the following sentence:—

"There are only four permanent brick-kilns in the district, three at Fatehpur, and one at Bindki."

In line 14 from bottom *delete* "from Rs. 14 to Rs. 15-8-0."

In line 13 from bottom *substitute* the following, for "set in mud":—

"If set in clay, Rs. 17 per hundred cubic feet for first class bricks, Rs. 15 for second class and Rs. 12 for third class, if set in lime, Rs. 24, Rs. 21-8-0 and Rs. 18 respectively."

Page 19.

In the third line *add* "salwood costing Rs. 4-4-0" *after* "foot" in continuation changing "full-stop" into "comma."

PARAGRAPH JUNGLE.

In the sixth line from bottom *substitute* "little" *for* "nothing" and in the second line from bottom *add* "and jhao" *after* "grasses."

Page 20.—PARAGRAPH GROVES.

In the first sentence *after* "is" *delete* the remaining words in the sentence and *substitute* "2·15 per cent. of the whole."

In line 11 *after* "bhur" *add* the following:—

"The grove area has been reduced largely by stricter classification, 9 good sized trees being considered to constitute grove."

Delete the sentence "at the time of the last . . . . . . trees" beginning in the second line from bottom and ending in the second line in page 21.

Page 21.

In the second line *add* "for mahuas" *after* "pay" and in the third line *add* "generally annas two for each tree" *after* "peri."

In the seventh line *after* "trees" *substitute* "of" *for* "for."

PARAGRAPH FAUNA.

Add a "comma" *after* "offenders" in line 10 and *delete* the whole of line 11 and the word "and" in line 12.

In line 16 *after* "1903" *add* the following:—

"The number killed by wolves has greatly decreased, there being only one in 1914, but there are still a number of wolves and hyaenas to be found. Rewards were paid in 1914 for killing 4 leopards and 21 wolves, 13 of the latter being cubs. The frequency with which the kunchbandhia shikaries bring in wolf cubs leads to a suspicion of their being reared, so the payment of rewards for them is now stopped. One hundred and seventeen deaths from snakes were reported in the same year."

Page 22.—PARAGRAPH BIRDS.

In the third line *substitute* "are fairly numerous" *for* "abound" and in the fourth line "are found" *for* "swarm."

In the fifth and sixth lines *substitute* "comb-duck, spot-bill" *for* "brown goose."

Page 23.—PARAGRAPH CATTLE.

Delete the last sentence, e.g. "There has . . . . . . prevails" and *substitute* the following :—

"The usual Brahmani bull system prevails, and even this is in parts, as round Fatehpur, is largely decreasing. One District Board bull is kept by Rai Bahadur Ishwar Sahai at Bilanda, but with this exception there has been no attempt made at any time to improve the local breed of cattle by selection."

Page 24.

In line 19 *after* "average" *add* the following :—

"The next census of 1909 revealed a drop in all classes, with exception of cow-buffaloes and young stock, while the following census, in 1915, gave 130,089 bulls and bullocks, 86,394 cows, 35,841 male buffaloes, 62,245 cow buffaloes, and 142,286 young stock. There are therefore fewer animals of all classes in the district now than there were in 1899, and no doubt the famine of 1908 and the scarcity of 1914 killed off a good deal of useless stock. The average number of plough cattle per plough is 2·17."

PARAGRAPH SHEEP AND GOATS.

In the fifth line *after* "Mirzapur" *add* the following :—

"Sheep increased by 1909 to 100,270, but again dropped in 1915 to 91,254, while goats on the other hand dropped in 1909 to 169,554, but rose by 1915 to 206,703."

Page 25.

In the second line *after* "Rs. 5" change "full-stop" into "comma" and *add* the words "but they are most valued for their skins."

PARAGRAPH OTHER ANIMALS.

In the second line *after* "which" *delete* "numbered 12,930" and *substitute* "are decreasing and numbered 10,430."

In the seventh line *substitute* "104" *for* "53" and "4,130" *for* "4,398" and in the eighth line *substitute* "344" *for* "236."

In line 13 *substitute* "15,000" *for* "14,000."

At the end of paragraph under cattle disease *after* "preventive measures" *add* the following :—

"As soon as the veterinary department is able to supply the men, there will be four such assistants."

Page 26.—PARAGRAPH RAINFALL.

Substitute the following for the first sentence :—

"Observations extending over the period between the last two settlements give an annual average rainfall for the district of 34 inches."

In the third line *substitute* " head quarters and the outlying tahsils " *for* " each tahsil."

Delete the third sentence, e.g. " there is very little . . . . district" and *substitute* " Khaga records the heaviest and Khajuha the lightest."

Page 28.

In the seventh line *after* " prosperity " *delete* the remaining words in the sentence, and *substitute* the following :—

" But owing to plague and continued migration population has decreased steadily."

PARAGRAPH VITAL STATISTICS.

In the last sentence *delete* the words " the obvious conclusion . . . . same time " and *substitute* the following :—

" In the three following years the recorded death rate is high and also the recorded birth rate. The population at the census of 1911 was less by nearly 10,000 than in 190 I. The conclusion must be that."

Page 29.—PARAGRAPH FEVER.

In the last sentence *read* " famines " *for* ' famine " and *add* " and 1907-08 " *after* " 1897 ", and *delete* the remaining words in the sentence *after* " 1897 " and *substitute* the following :—

" From 1912 to 1914 the mortality has been remarkably low."

Page 31.

In line 14 *after* " 1904 " *add* the following :—

" Bindki and Khaga are still the chief sources of infection."

CHAPTER II.

AGRICULTURE AND COMMERCE.

Page 34.

After " total " in line 11 *add* the following :—

" In 1913 it had fallen to 495,996 acres."

PARAGRAPH CULTURABLE AREA.

In lines 7 and 8 *delete* the words "1905 to 213,204 acres . . . .largely decreased" and *substitute* "1913 to 298,082 acres, or 28·4 per cent. of the total."

In line 9 change "full-stop" into "comma" *after* "acres" and *substitute* "but owing" *for* "owing."

Delete the remaining words in the sentence *after* "figures" in line 10.

Page 35.

In the last line *read* "soil" *for* "spoil."

Page 37.

In line 22 *add* "and poppy" *after* "wheat," and *substitute* "in less degree" *for* "possibly" in the same line.

Page 37.—PARAGRAPH HARVESTS.

In the third line from the bottom *after* "equal" *delete* the remaining words in the sentence and *substitute* the following:—

"Their percentages at settlement being 58·4 and 56·3 respectively, normal years being selected."

Page 38.

Delete the sentences beginning with the words "the double-cropped" in line 4 and ending with the words "per cent." in line 18 and *substitute* the following:—

"At settlement the double-cropped area was reckoned to amount to 14·98 per cent. of the whole cultivated area, and this represents a larger increase on the figure of 1170, when it was only 8·7 per cent. The highest proportion is to be found in the Haswa pargana, where it amounts to 23 per cent. while next comes Aya Sah with 22, and then Hathgaon and Dhata with 21 each. The lowest proportions are found in Kora (9), Bindki (8) and Muttaur (7·5). The figures are taken from the statistics of 1318 F. in the case of all tahsils except Khaga and of 1320 F. for the last named tahsil. Both these were normal years."

In line 27 *read* "birra or gram" *for* "the birra."

Page 39.

In the second line *after* "harvest" *add* "(at settlement the percentage was 41)."

Page 41.

Delete the words "it is probable . . . . . been poor" in lines 5, 6, and 7.

Page 42.

In line 12 *substitute* " more than " *for* "nearly."

In line 13 *read* " 23 " *for* " 15."

In line 17 from the bottom *substitute* " 19 " *for* " an average of 13."

In line 9 from the bottom *delete* the remaining words in the sentence *after* the word " degree."

Page 43.

In the second line *after* the word " tahsils " *delete* the remaining words in the sentence.

Delete the sentence beginning with the words " the only " in line 5 and ending with the word " crops " in line 9 ; and *substitute* the following :—

" The most notable change in the rabi staples since 1870 is the increase in the area sown with wheat, and particularly pure wheat."

Page 45.

In the second line *after* " district " *add* the following :—

" In 1913-14 however the supply of canal water was nearly adequate, though heavy demands were made on the canal."

PARAGRAPH SOURCES OF SUPPLY.

At the end of the paragraph *add* the following :—

" At the settlement it was reckoned that 48·4 per cent. of the total cultivated area was irrigable, the proportions being 51·1, 13·8 and 35·1 per cent. respectively."

Page 52.

In line 7 *substitute* " 13,996 in 1914 " *for* " 13,819 in 1905."

In line 16 *after* " wells " *add* " of which 2,794 were returned in 1914."

Page 54.

At the end of paragraph ending with the word " jharna " *add* the following :—

" There has been general complaint in recent years that the water level has receded and the wells hold much less water than

they used to do. This is due apparently to the short rainfall, and a rainy cycle would probably restore the old conditions."

Page 59.

After the paragraph "Famine of 1897" *add* the following paragraph heading it on the margin as "scarcity of 1907-08":—

"Towards the end of 1907, owing to the cessation of the rains, distress began to be felt one or two poor-houses and test works were opened, but attracted little labour, numbers having gone to the large public works in Banda, and the people of the Jamna tract preferring semi-starvation with the hope of getting on the gratuitous list. Scarcity was declared on the 9th January, 1908, for the whole district, though only the portion lying along the Jamna was seriously affected, and gratuitous relief began on the 16th February. By the 4th April there were 14,144 receiving this relief, though the number on test works never exceeded 1,289. When the rabi was harvested and the mahua in flower, test works were closed, being replaced by small civil works, distributed over the worst tract, and the gratuitous relief lists were rigorously cut down, till on the 16th May they showed only 2,696. This number remained steady till the rains broke, while those on village works also fluctuated in this period about the figure 2,000. Civil works were opened on the 21st April, poor-houses having been closed three weeks earlier. These were finally shut down on the 1st August, and the last valedictory doles given about the same time. The rains broke somewhat late, but were well established by the middle of July. Altogether Rs. 70,484 was given in gratuitous relief. Nine unaided works were conducted by various zamindars, and 46 aided, the latter costing the Government Rs. 13,059. The cost of the poor-houses was Rs. 1,320, including their construction, and the total expenditure on the scarcity operations, as returned in September 1908, was Rs. 1,07,511. Fodder was never in serious defect, save towards the Jamna in parts: Government hay to the extent of 2,048 maunds was brought in and either sold or given as a taqavi advance. Rs. 1,27,000 of revenue were remitted and Rs. 2,69,000 suspended and at the same time Rs. 1,04,000 were distributed as taqavi. The total amount subscribed to the charitable relief fund by the gentry of the district was Rs. 855, of which Rs. 100 came from Asothar."

SCARCITY OF 1914.

"In the beginning of 1914 a similar tract along the Jamna with an area of 382 sq. miles and a population of 113,912 began to feel distress, and a test work was opened on the 23rd February at Sarauli. It proved of little use and was closed three weeks later. Scarcity was declared on the 8th February, and one or two aided works were started, but by March the attendance fell off rapidly. The people took more kindly to the gratuitous relief, but by the 14th March there were only 1,182 persons being assisted. The rabi harvest took away all the labourers, and they stayed away to prepare sugarcane and zaid crops, being fortified by good harvests of mahua and mango. It is true there were loud cries for work, but few would move beyond their doors to get it. Seven or eight aided works were started in a chain along the bad tract, but up to the 30th May the number of labourers only exceeded 200 on three dates in June when some district board works were also in progress, they averaged 400, or 500, and once rose to 600, but the rain fell on the 1st July and by the 4th there were only 10 labourers left. Valedictory doles were given on the 24th August. About 1 lakh was distributed in taqavi, while revenue was remitted to the extent of Rs. 2,44,135 and suspended Rs. 2,53,117. The direct cost of the scarcity proceedings was Rs. 37,996, of which Rs. 31,726 went to gratuitous relief, Rs. 4,676 to aided works, and Rs. 1,294, to test works. The gentry of the district subscribed Rs. 1,464, and to this the Indian People's Famine Trust added Rs. 1,500."

Page 62.

Delete the sentence beginning with the word "from" in line 2 and ending with the word "settlement" in line 6 and *substitute* the following:—

"In the ten years preceding the recent settlement the average price of wheat was 11·6 seers to the rupee, that of barley 16·5 seers, and that of gram 16·3 seers, representing advances of 61·57 and 49 per cent. respectively, as compared with the prices ruling in the ten years preceding the settlement of 1870."

Page 64.

In line 17 *read* "zamindars" *for* "zamindar" and *after* "Gamhri" *add* "Also Mathura Prasad, bania, of Husainganj

and the Kurmis of Jairampur Gurgaula in pargana Ekdala."

Delete all the lines in the paragraph *after* "1901" in line 18, and *substitute* the following:—

"And these have now grown into 29 rural and 1 urban society working under a central bank at Fatehpur. They are all under the management of Rai Ishwar Sahai Bahadur. Six of them have their own schools, where the members' children are taught free in the afternoons. It is hoped to extend the number of banks in the near future."

CHAPTER III.

THE PEOPLE.

Page 79.—PARAGRAPH CENSUS OF 1901.

In the first sentence *delete* the words "the last enumeration . . . . March," and *substitute* "then followed the enumeration of."

At the end of the paragraph *add* the following paragraph heading it as "census of 1911":—

CENSUS OF 1911.

"The last census took place in 1911. Owing to Plague and Cholera, emigration and other causes the population dropped 1·4 per cent. to 676, 939."

PARAGRAPH DENSITY.

In the first line *substitute* "412·7" *for* "420·8."

Page 80.

After the word "tracts" in line 5 *delete* all the remaining lines in the paragraph, and *substitute* the following:—

"Within the district, an analysis of the density per square mile of cultivation shows that the northern parganas are all more densely populated than the southern, though there is a tendency now a days to migrate from the former to the latter, owing to the advantages afforded by canal irrigation. The densest populations are found in Kutila, Fatehpur, and Hathgaon, and the least dense in Muttaur, Tappa Jar and Ekdala."

PARAGRAPH TOWNS AND VILLAGES.

In the first line *substitute* "1,367" *for* "1,408."

The increase in the rent-roll between the 1870 and 1913 settlements amounted to only about 11 per cent. and the increase in the cultivated area to about 5 per cent. Owing to the different qualities of the soil contained in each the average rent rates paid in the various parganas vary widely. The highest are found in parganas Bindki and Kutia Gunir, where were Rs. 5-7-8 and Rs. 5-8-0 respectively at the recent settlement. They exceeded Rs. 5, also in parganas Fatehpur, Haswa, Kutila and Hathgaon, but in the south the averages are lower, Ghazipur coming last with Rs. 3-10-5 and Ekdala next to it with Rs. 4-4-4. The variations in the rates paid for the different classes of land are illustrated by the circle rates fixed at the recent settlement. These range from Rs. 14-6-0 for the best irrigated home lands to Re. 1-4-0 for the most inferior land in the neighbourhood of the Jamna. The most usual rates for the best irrigated land outside the gauhan was Rs. 7 per acre and for similar land without means of irrigation Rs. 4-12-0. The difference between the rates paid by occupancy and non-occupancy tenants was most marked, the respective incidences being Rs. 4-7-8 and Rs. 5-8-8. In fixing rents the chief factors are the class of the cultivator and the natural advantages of the holding, but a good deal depends on the character of the proprietor. Natural advantages are greatest in the class of land near the towns and large villages on which garden crops are

grown by Murais and Kachhis, who pay from Rs. 12-0-0 to Rs. 20-0-0 per acre. The recorded rents may be taken as genuine generally, as the collusion necessary for the recording of incorrect rents is impracticable, and proprietors would find it difficult to collect unrecorded rents. The district is one of independent tenants and indebted proprietors, though the condition of the latter has improved largely in recent years. Rents are paid in most cases in equal instalments *after* the rabi and kharif harvests, but in the rice villages it is customary to collect ten annas in the kharif and the remaining six annas in the rabi."

SETTLEMENT OF 1911.

"In October 1911 Mr. C. L. Alexander was appointed settlement officer, and continued to hold that post till March 1915, when the operations were virtually completed. Mr. H. Bomford worked as assistant settlement officer from October 1912, to August 1913, and inspected and assessed tahsil Ghazipur. Tahsil Fatehpur was inspected in the cold weather of 1911-12, tahsils Khajuha and Ghazipur in that of 1912-13, and tahsil Khaga in that of 1913-14."

METHOD OF ASSESSMENT.

"The survey of the previous settlement was accepted as correct, and the existing maps were corrected, with a view to the proper record of new cultivation and subdivision of fields, by the patwaris—who were given special instruction in survey—under the supervision of the supervisor qanungos and assistants specially appointed to help the latter. In regard to soil classification the methods used differed from those employed by Mr. Patterson. In the first place, whereas in 1870 the irrigable areas had been demarcated by the settlement officer at inspection, in 1911 they were determined by recording as irrigable all fields which had been actually irrigated in one or more of four ordinary seasons immediately preceding the year of inspection, the record being based on the khasras and corrected, where necessary, during the course of inspection. It is worthy of note that, whereas in 1870 47·3 per cent. of the cultivated area was recorded as irrigable, in 1911 the area so recorded was only 48·4 per cent. in spite of the construction of a large number of new masonry wells and the introduction of the canal into the southern half of the district. In the second place the system of classification by natural soils was abandoned in favour of a system which took into consideration all the natural advantages of the land, e. g. position, soil and facilities for irrigation. Almost all the land was divided into gauhan manjha and har. There were four classes of gauhan, the first being virtually all home land in which garden crops were grown by high class cultivators, and the fourth being unirrigated home land. Manjha and har were each divided into two classes, and further subdivided into wet and dry by the methods already explained, but the wet area in har

was almost negligible. In addition to the above main classes there were three classes of chanchar or poor rice land, and two of kachchar or fluvial deposit found generally in ravines, the methods used for differentiating between wet and dry land being inapplicable to these soils. In the alluvial tract the land was all marked as tarai and divided into four classes, the first being tarai gauhan; no distinction was made between wet and dry. The classification was more exhaustive than Mr. Patterson's, and there was a much larger difference between the rates applied to the best and worst lands. As rents still almost invariably were paid in the lump and covered fields of widely varying natural advantages, the settlement officer, like Mr. Patterson, had to analyse the rent and ascertain the proportionate value of each soil-class. He found it convenient to fix their values in terms of annas, this method being intelligible to the cultivators and proprietors, and he did this making manjha I wet equivalent to annas 12 and valuing the other classes with reference to this standard. Each pargana was divided during the course of inspection into circles, all save one being topographical, and circle rates were obtained by taking the average of the rates which the settlement officer considered, taking all things into account, to be appropriate to each individual village".

THE REVENUE.

"The gross assets amounted to Rs. 30, 57, 767 including Rs. 12,940 siwai income. From this Rs. 37,509 was deducted by way of allowances made to proprietors for land cultivated by themselves and Rs. 16,198 for improvements made by proprietors, leaving net assets of Rs. 30,04,060. This sum exceeds Mr. Patterson's assessed rental by 15·3 per cent. The share taken as revenue was Rs. 14,40,646, or 47·95 of the net assets, the general result being an increase of 10·3 per cent. This is still Rs. 3,838 short of the revenue which the Oudh Government was exacting at the time of cession, and Rs. 11,101 less than the revenue fixed in 1840. Special attention was devoted to abolishing the existing inequalities of assessment, and the results consequently varied widely in different parganas as well as in different villages. The largest increases took place in parganas Kutila (24·51 per cent.), Hathgaon (23·41 per cent.) and Dhata (19·03 per cent.), and the smallest in parganas Muttaur (5·27

per cent.), Kutia Gunir (5·55 per cent.), and Aya Sah (5·72 per cent.), while in pargana Bindki there was a decrease of 1·32 per cent. The average demand per acre of the cultivated area was Rs. 2-9-7 as compared with Rs. 2-7-6 of the previous settlement. The new assessments have been ordered to be in force for 30 years, but, as before, came into force on different dates in different parganas. In Fatehpur, Haswa, Kutia Gunir, Bindki and Tappa Jar they run from 1915, in Kora, Aya Sah, Muttaur and Ghazipur from 1916 and in Kutila, Hathgaon, Ekdala and Dhata from 1917. The settlement operations took place earlier than was necessary in view of the dates of the expiry of the previous assessments, the reason being that it was proposed originally to allow reductions of the revenue to take effect at once, but this proposal was subsequently disallowed by the local Government. The alluvial mahals were assessed with the rest of the district, but their assessments are liable to revision at the end of every five years. A feature in which the recent settlement differs remarkably from its predecessor is the large sums decreed in cases of enhancement of rent. In the previous settlement the rent-roll was increased in this way by only Rs. 6,009, but in the last settlement it was increased by Rs. 137,350. The revenue is payable in four instalments, those for the kharif harvest being due on the 5th of December, and the 1st of January, and those for the rabi on the 1st of May, and the 1st of June."

The last named irrigation is not of much value, as the tanks are all shallow. The canal has effected a very large improvement in irrigation facilities. The area recorded as grove amounted to 2·7 per cent. of the whole. Culturable waste accounted for 10·4 per cent. and fallow for 10·7 per cent. the latter figure being somewhat higher than usual owing to the character of the season. Small patches of dhak are to be found along the drainage lines, but there are practically no grass lands, the river beds being used for rice cultivation. The barren area amounts to only 12·5 per cent. of the whole, and this is the lowest figure in the district, owing mainly to the absence of any extensive usar plains and ravine land. In the third line from bottom *substitute* "tarai" *for* "kachhar."

Delete the sentence beginning with "on the whole" in the third line from bottom and ending with the word "tanks" in page 190 in line 4 and *substitute* the following:—

"Although the soil is on the light side it is of a good uniform quality and the proportion of bad soil is very small, Jamna ravines extending only a short distance inland. Before the introduction of the canal-irrigation was very difficult owing to the great depth of the wells; and the cultivators relied chiefly on shallow artificial tanks. The canal has effected a great improvement, and serves the pargana better than any other pargana in the district, effectually guarding it against drought, except for the

villages bordering on the Jamna. The pargana was all included in one circle at settlement."

Delete the last two sentences in the first paragraph, e.g. "The loam . . . per cent." and "The rest . . . per cent."

PARAGRAPH 2.

Delete the first two sentences and *substitute* the following :—

"At the time of the settlement of 1817 the cultivated area was 14,487 acres, and it has now increased to 15,029 acres, the highest figure recorded being 15,734 acres in 1885. The proportion of the total area under the plough is over 71 per cent., the highest figure in the district. Culturable waste accounts for 3·8 per cent., old fallow for 4·9 per cent., and grove for 1·8 per cent., the unculturable area being 15·6 per cent."

Page 191.

Delete the remaining lines in the first paragraph after the first sentence and *substitute* the following :—

"At last settlement the rabi crops occupied 65·87 of the total cultivated area and the kharif crops 55·33 per cent. the double-cropped area being 21·34 per cent. The last is a high figure for the district, and shows a considerable increase as compared with the previous settlement. In the rabi birra is the principal crop with 21·19 per cent. but is followed closely by wheat with 17·06 per cent. and gram with 15·84 per cent., the last named being sown chiefly in succession to rice. Rice with 15·98 per cent. is the most important kharif crop. Juar comes next, with 13·91 per cent. and is followed by cotton with 13·70 per cent. There is virtually no sugarcane. Altogether

the standard of cultivation as shown by the crops grown is high for the district, as might be expected with so many cultivators of good class."

"The general rent-rate immediately before settlement was Rs. 4-10-8 while occupancy tenants paid only Rs. 4-5-1. The rates are high as compared with other Jamna parganas, but, as has been pointed out, the Jamna tract in this pargana is very small, and the rates paid were low in view of the excellent facilities for irrigation, the Kurmi landlords being very reluctant to raise the rents of the Kurmi tenants as is shown by the fact that only two castes pay lower average rents than the Kurmis. The revenue has been increased at the last settlement by 19·3 per cent., and the new revenue incidence per acre of cultivation is Rs. 2-10-3. The revenue demand at successive settlements will be found in the appendix."

PARAGRAPHS 2 AND 3.

Delete the lines beginning with the word "Taking" in the fifth line from bottom of paragraph 2 and ending with the word "district" in line 14 in page 195, and *substitute* the following:—

"At the last settlement the pargana was divided into two circles, circle I being the tract north and circle II the tract south of the Bari Nadi. It bears a close resemblance to pargana Tappa Jar. The land included in circle I has great natural advantages, but that included in circle II is a very poor tract, though even here level areas of good loam are found, the absence of irrigation however, makes it very precarious. The canal has benefited circle I greatly, but has virtually not reached circle II at all. Between the settlements of 1870 and 1911 the cultivated area increased from 64,680 acres to 70,230 acres, the increase being confined almost entirely to circle II, an indication of its improved condition in spite of its disadvantages. 60·3 per cent. of the whole area is now under the plough. Of the remaining 1·3 per cent. was classed as grove, 4·9 per cent. as culturable waste, and 9·4 per cent. as old fallow, the barren area amounting to 20·9 per cent."

"At last settlement the area occupied by rabi crops was 57·38 per cent. of the whole, and by the kharif crops 55·43 per cent., the double-cropped area being only 12·95 per cent. of the whole pargana though it reached the high figure of 23·92 per cent. in circle I. Barley (pure and mixed) is the principal rabi crop, its percentage being 24·76, while gram occupesi 15·02 per cent., and wheat (pure and mixed) 11·28 per cent. The chief products in the kharif are juar (17·77 per cent.), cotton (11·83 per cent.), rice (11·68 per cent.), the last-named crop being confined to circle I, and bajra (9·68 per cent.). The area under sugarcane is negligible. The canal has effected a considerable improvement in the staples."

Delete the words "25·7 per cent....quickly," beginning in the third line and ending in line 12 and *substitute* the following :—

"20·6 per cent., three-fifths of this being waste, and the rest under water. Culturable waste amounts to 5·6 per cent. and old fallow to 9 per cent. The cultivated area in 1870 was 14,042 acres, but in 1911 had increased to 15,851 acres or 60·8 per cent. The pargana recovered quickly from the affects of the drought of 1897."

Delete the words "In 1,905 . . . tanks." beginning in line 11, from the bottom and ending in line 4 and *substitute* the following :—

"In the matter of irrigation Kutila is second only to pargana Hathgaon, 61 per cent. of the cultivated area being recorded at settlement as irrigable, 56·1 per cent. being from wells."

In the fourth line, from bottom, *substitute* "nearly doubled in numbers between settlements" *for* "increased in numbers."

Page 268.

Substitute the following for the second paragraph, viz. "The *rabi*...1,000 acres" :—

"At settlement rabi crops occupied 69·7 of the cultivated area, and kharif crops 47·3, the double-cropped area being 17·9 per cent., a very large improvement on the figure of 1870. Barley (nearly always mixed) with a percentage of 41·5 is by far the most popular rabi crop, and wheat comes next with 14·6 per cent. In the kharif juar (15 per cent.) and bajra (11·5 per cent) are the most important crops, rice occupying only 5·7 per cent. and sugarcane 1·1 per cent.

Nearly 4 per cent is sown with poppy, this being a larger percentage than is found in any other pargana."

PARAGRAPH 3.

In the first sentence *substitute* "141" *for* "144" and "417" *for* "416."

In the second sentence *substitute* "84." *for* "122," "264" *for* "231," "61" *for* "56," and "eight" *for* "seven."

In line 6 *after* "Sheikhs" *add* "and are followed by Rajputs and Brahmans."

After "are" in line 7 *delete* the remaining words in the sentence and *substitute* "Musalmans, Ahirs, Rajputs, Brahmans, and Murais."

Delete the remaining words in the sentence *after* "is" in line 10 and *substitute* the following:—

"Only 14 per cent., but nowhere do Murais occupy such a prominent place."

In line 12 *substitute* "71·7" *for* "70·3."

In line 7, from bottom, *substitute* "12·4" *for* "17·7."

In line 6, from bottom, *substitute* "10" *for* "9·7" and in the fifth line *substitute* "3·8" *for* "1·4" and *delete* "very" before "small" in the same line.

In the fourth line, from bottom, *substitute* "immediately before settlement was Rs. 5-3-10" *for* "is 5-2-0"

In the third line, from bottom, *substitute* "5-0-2" *for* "somewhat more."

In the second line *substitute* "1870" *for* "settlement" and in the last line after "assessments" *delete* the words "as well as the demand in 1905."

Page 269.

Delete the last sentence to the first paragraph, e. g. "The incidence...assessment" and *substitute* the following:—

"At the last settlement the revenue was increased by 24·51 per cent., the largest increase in the district, but the present incidence per acre of cultivation, viz. Rs 2-11-6, is still lower than those of Hathgaon, Fatehpur, Bindki, and Kutia Gunir."

LALAULI.

In the sixth line *substitute* "Bindki to Sheorajpar" *for* "Lalauli."

Page 270.

Delete the seventh line.

In the last sentence in the first paragraph, *substitute* "4,992" *for* "4,864" and "8,625" *for* "8,300."

MALWA.

Delete the third sentence and the word "lower" in the sixth line from bottom.

In line 9 *substitute* "1,298" *for* "1,268" and in line 10 *substitute* "1,995" *for* "1,718."

MUTTAUR PARGANA.

In the last line, in first paragraph, *substitute* "57,464" *for* "57,516" and "89·8" *for* "89·9."

Page 274.

In the third line *after* "pargana" *add* "but only a very small portion of this is subject now to fluvial action and consequently demarcated as alluvial."

Delete the remaining lines in the first paragraph *after* "watering" in line 12 and *substitute* the following :—

"The *kachhar* also, though it is no longer flooded by the river, is extremely fertile and retains water close to the surface all through the cold weather. Unfo rtunately however this soil is peculiarly liable to the ravages of *kans*, and this just appears to be spreading in it rapidly. The pargana was divided at the last settlement into two circles, circle II comprising the villages adjacent to the Jamna and circle I the rest."

PARAGRAPH 2.

In the first sentence *substitute* "less than one" *for* "2·2."

In line 6 *substitute* "13·8" *for* "26·1."

In line 8 *substitute* "3" *for* "13·1" and *after* "per cent." *delete* the remaining words in the sentence and *substitute* the following :—

"And old fallow 10·4 per cent., a high figure, due to the fact that much of the land is cultivated and left fallow alternately for periods of years."

Page 275.

In the second line *after* "acres" *delete* the remaining words in the sentence and *substitute* the following :—

"The area recorded in 1320 Fasli was 31,907 acres or 55·5 per cent. of the whole, and this proportion is only exceeded in Ekdala and Dhata."

Delete the remaining lines in the first paragraph *after* "Dhata" in third line and *substitute* the following:—

"Excluding the alluvial tract, only 5·1 per cent. of the cultivated area was returned at settlement as irrigable, virtually all the irrigation being supplied by the canal. In 1870, 7 per cent. was returned as irrigable, though there was no canal."

PARAGRAPH 2.

Delete the whole of the paragraph and *substitute* the following:—

"Wheat is grown largely and with success in the alluvial tract, barley, gram, and castor oil being the other crops sown. In the remaining portion of the pargana rabi crops occupied 50·2 per cent. of the whole cultivated area at settlement, and kharif crops 57·3 per cent., the double-cropped area being only 7·5 per cent., though this figure, owing to the canal, is more than three times as great as in 1870.

In the rabi barley (nearly always mixed), with 23·4 per cent., is the most important crop and is followed by gram (17·2 per cent.) and wheat (8·9 per cent.), In the kharif, juar (22·5 per cent.) and bajra (21 per cent) are the favourite crops, cotton occupying 6·1 per cent. and rice only 2·5 per cent. The area under sugarcane is negligible."

PARAGRAPH 3.

In the first sentence *after* "Brahmans" *delete* "and" and *add* "Musalmans," and *after* "Kewats" *add* "and Ahirs."

In the fourth line *substitute* "49·3" *for* "43" and in the fifth line *substitute* "29·3" *for* "32."

In line 8 *substitute* "15·4" *for* "23."

In the last line *substitute* "five" *for* "four" and "immediately before settlement was Rs. 4-0-10 per acre, occupancy tenants paying Rs. 3-14-6" *for* "Rs. 4-0-10 per acre, occupancy tenants paying Rs. 3-14-9" ending in the first line in page 276.

In line 7 *substitute* "tarai" *for* "kachhar."

Page 285.

In the second line *substitute* "tarai" *for* "kachhar" and in the third line *delete* "very."

Page 286.

After "area" in the first line *delete* the remaining words in the first paragraph, e. g. "amounting...per cent." and *substitute* the following:—

"At the last settlement the pargana was divided into two

circles, circle I being the land north and east of the Rind and circle II that south and west of it with the exception of the villages, viz. Daryabad and Mau, which, though lying on the left bank of the Rind, were included in circle II as having the same physical characteristics as the rest of that tract. The alluvial tract was dealt with separately."

PARAGRAPH 2.

Delete the lines 1 to 14 from "Groves" to "fallow" and *substitute* the following:—

"At settlement less than one per cent. of the whole area was classed as grove, but it must be remembered that this is virtually confined to a single tract. The barren area amounted to 24·8 per cent., and this high proportion is mainly due to the ravines, for though there is a certain amount of *usar* its extent is comparatively small, and it is found only in the Bari Nadi valley. The ravine-land contains numerous patches of thorn-scrub of some value for grazing purposes, but apart from this there are no jungles in the pargana. Culturable waste covered 3·4 per cent, and old fallow 10·3 per cent., this high figure being due to the fact that in the Jamna tract much land is cultivated and left fallow alternately for periods of years."

In line 14 *delete* "last" before "Settlement" and *add* "1870" *after* "Settlement."

Delete the words "1,905 to 37,807 acres . . . or 55·3 per cent. of the whole" *after* "in" in lines 9 and 10 from bottom, and *substitute* "1320 fasli to 37,014 acres or 53·6 per cent. of the whole."

Delete the words "before the extension . . . per cent." beginning in line 7 and ending in line 2 from bottom and *substitute* the following:—

"At settlement, excluding the alluvial tract, 60 per cent. of the cultivated area in circle I was classed as irrigable, and only 5 per cent. in circle II, the percentage for the whole pargana being 41·3, 30·2 supplied by the canal, and 8 by wells."

Page 287.

Delete the last sentence, viz. "In 1905 . . . cultivation" in the first paragraph.

Substitute the following for the second paragraph, e.g. " the rabi...tenants."

"In the alluvial tract wheat is the most important crop and fine crops of this are seen; barley, gram, and castor-oil are the other crops seen. In the remainder of the pargana rabi crops occupied 58·2 per cent. of the cultivated area at settlement, and kharif crops 55·1 per cent., the double-cropped area amounting to 13·4 per cent. Barley (generally mixed) with 29·7 per cent. is the favourite rabi crop, and gram with 16·6 per cent. comes next, the percentage of wheat being 10·8. Wheat also is generally mixed. In the kharif by far the largest area, viz. 25 per cent., is occupied by juar. Bajra occupies 7·9 per cent. cotton 7·6 per cent., and rice 6·9 per cent., less than one per cent. is sown with sugarcane."

PARAGRAPH 3.

After the word "are" in the first line *delete* the remaining words in the sentence and *substitute* the following :—

"Brahmans, Kurmis, Rajputs, Musalmans, Kewats and Ahirs; but the Kurmis hold no less than 18 per cent. of the cultivated area. There are few Murais and virtually no Lodhs."

In the fourth line *substitute* "69" *for* "54·7" and in the last line "5·2" *for* "six" and "22" *for* "26."
